

Layout Criteria Checklist

Putting together a magazine requires a great deal of planning. This checklist will help you to keep organised. Some things to consider are...

... numbers

How many pages is each group submitting as their contribution to the magazine?

... location

What is the best place in the magazine to place a submission? Are there any that would fit better at the front of the magazine instead of the back?

... balance

Is there a balance between illustrations, text, charts and maps throughout the magazine?

... aesthetics

Is the final product easy to read and attractive to look at? Does it draw your attention and make you want to read it?

What else would you add? What would be important to you?
